- a. Oceans play a major role in water cycle.
- b. Oceans regulate the climate and sustain life on the earth.
- c. More than half of the world's CO₂ is produced by the ocean's flora.
- d. Oceans have nourished the cultures of coastal people all over the world.

3. Which is the third largest ocean in the world?

- a. Arctic Ocean
- b. Pacific Ocean
- c. Atlantic Ocean
- d. Indian Ocean

4. ----- is the largest island in the world.

- a. Madagascar
- b. Andaman and Nicobar
- c. Greenland
- d. Hawaii

SOURCE BASED/CASE BASED QUESTIONS

5. Read the source given below and answer the questions that follow:

The United Nations has designated June 8 as World Oceans Day to “remind us all of the major role the ocean plays in everyday life. It serves as the lungs of our planet, a major source of food and medicine and a critical part of the biosphere.” Scientific studies have shown how the oceans

are polluted by human activity — we throw several million tonnes of plastic waste into the oceans every year, choking marine life. There are several other forms of pollution. As a result, the marine environment is under threat. Overfishing (excessive fishing) is another cause for the decline of marine life. It is our collective responsibility to protect oceans for the future of the planet and of humanity.

a) Which day is observed as World Oceans Day?

b) Mention important roles played by oceans in our everyday life.

c) How are oceans polluted?

d) Why do we need to protect the oceans?

6. On the outline map of the world given below, label all the continents and oceans.
